Hatice AKYIL

Biologist, MediHealth Academy Publishing, Ankara, Türkiye

At DAWN,

I believe we had favorable success in the first anniversary of the journal "Surgery on Children," going to a more significant target for better circumstances of children's health. The journal itself is a very fruitful base for authors who have concerns about treating the pediatric age group holistically. Collaborative management is the journal's only task, which is why it is named "Surgery on Children."

To work together, one must be part of a "writer" academic persona. Conversation and good intentions can never be sufficient if writing and "being capable of writing" are absent. So, the mission of the journal demonstrates itself at this point.

Previous year, we had four issues with 24 articles. These articles ranged from case studies and research papers to reviews and editorials. Most importantly, various branches of health-caring tasks contributed to the journal. Nurses, anaesthesiology specialists, pediatric urologists, pediatric surgeons, orthopaedists, nuclear medicine specialists, plastic surgeons, ear-nose-throat surgeons, and pediatric specialists submitted articles to give their hands to this calling. That concludes the success of the journal in the last year.

Contributing to the journal not only provides a platform to share your expertise but also fosters collaboration and learning across different medical specialties. We look forward to welcoming contributions from ophthalmologists, neurosurgeons, emergency and intensive care specialists, pathologists, radiologists, thoracic surgeons, and technicians, as their unique perspectives will enrich our content and further our mission.

Of course, we encountered some functional and academic difficulties during this time. However, we are resolutely committed to overcoming these obstacles with the support of our respected publisher, Medihealth Academy. This commitment should reassure you of our dedication to the journal's continued success.

As a result, I believe the period we passed gives me a humble right to define the ongoing process as a "dawn." We are filled with an increasing eagerness to continue our mission. The journal is at dawn, and we are inspired to keep pushing forward.

Best Regards
Atilla ŞENAYLI
Editor-in-Chief
