Biostatistics Specialist, Ankara, Turkiye

Dear Colleagues,

As clinicians and researchers, obstacles are always before us, especially when working against pediatric diseases. Knowledge of treatment for children's diseases is often insufficient because of these interferences. You have to define strategies to solve problems in the route of treatment that contains not only the treatment for the specific disease but also the management of parents' psychology and other possible diseases that may add or be present. Also, you have to think about possible surgeries, courses of anesthesia, and nursing services that consist of the whole treatment process and, perhaps, hospitalization.

In contemporary health services, one can realize that colleagues must come together to lead a successful treatment. Being together, talking about all possible opportunities, and, better than this, working together to concentrate policies on children at every chance will be the best way to upgrade children's therapies.

Nowadays, we have informatics for all these disciplines. However, these efforts are far apart than we expected.

As a vital base of our philosophy, all health providers on children's wellness, like surgeons, anesthetists, nurses, and technicians, have to gather and interact to represent our ideas of collaborative management for treatments, particularly for surgical problems. We cordially hope that this journal will be a common field of presentation of our scope. We also hope that the journal will not only be a medium for declaring manuscripts but also a ground for succeeding in forming protocols for treating and managing child diseases.

Best Regards,

Prof. Atilla ŞENAYLI
Editor in Chief

ORIGINAL ARTICLE

- Opinions and approaches of pediatric surgery specialists and residents about neonatal resuscitation program-NRP: survey study..... 1-4
Andıran Şenaylı Y, Kaplan Sayar R, Ulusoy Tangül S.

REVIEWS

- Surgery preferences for thyroid diseases in childhood: review of the literature due to a case experience 5-8
Şenaylı A, Ulusoy Tangül S.
- Congenital cystic diseases of the lung 9-12
Günel N, Dere Günel Y.
- Pediatric otitis media with effusion: current surgical approach.....13-16
Şimşek B, Şencan Z.

LETTER TO EDITOR

- Diffuse alveolar hemorrhage..... 17
Kulice EC.
